Introduction

The Executive Programme in Engineering Management (Level 4) provides learners with basic knowledge and practical skills in managing engineering systems, processes, technology, and quality within organizational settings. The programme focuses on fundamental management functions such as planning, organizing, and controlling, alongside the application of standard engineering practices. It also emphasizes professionalism, ethical behaviour, and responsibility in performing routine engineering management tasks. Graduates are prepared to work effectively in teams and support engineering operations in structured environments.

Who Should Apply?

- Engineering technicians and technical support staff
- Junior engineers and engineering assistants
- Maintenance and production personnel
- Workers supporting engineering systems and operations
- Entry-level staff in engineering environments moving into technical management

Modules

Module 1: Principles of Management
Module 2: Human Resource Management
Module 3: Principles of Marketing
Module 4: Strategic Management
Module 5: Entrepreneurship
Module 6: Management Information System
Module 7: System Engineering and Management
Module 8: Engineering Process Management
